

HTML AND CSS TASK

Practical Workbook for HTML and CSS

www.techpile.in | www.techpileko.in +91-7007237006 | +91-9140444301

Day-2

Q-2.1: Write an HTML code to display 10 images using the tag with different attributes.

Each image must use at least 3 of the following attributes:

- **src** – path to the image
- **alt** – alternative text
- **width** and **height** – dimensions in pixels
- **title** – tooltip shown on hover
- **border** – border around the image

Q-2.2: Make a page and insert 5 audio files and 5 video files with different attributes.

Use a mix of the following attributes for both audio and video:

- **controls** – show playback controls
- **autoplay** – start playing automatically
- **loop** – repeat playback
- **muted** – start muted
- **preload** – auto | metadata | none

Q-2.3: Make a webpage with 5 moving <video> elements inside <marquee> tags and stop the marquee on mouseover. All videos must have different poster images.

Additional requirements:

- Use onmouseover and onmouseout events to stop/start the marquee.
- Set the marquee direction as left for the first row and right for the second row.
- Give each video a unique width and border style.

Q-2.4: Design an HTML webpage to display a college event notification board using the <marquee> tag with at least 4 different attributes.

The notification board should include:

- At least 3 different scrolling notices (e.g., exam schedule, sports event, holiday notice).
- **direction**, **scrollamount**, **behavior**, and **bgcolor** attributes.
- Style the page with a heading, a horizontal rule, and background color.

Q-2.5: Write the following sentences using the tag with different properties (size, color, and face).

- My name is Rahul. → Use color="red"
- I study in Class 10. → Use size="5"
- I like drawing. → Use face="Arial"
- My school is very big. → Use color="blue" and size="4"
- I have many friends. → Use face="Times New Roman" and color="green"

Q-2.6: Write the following sentences using character entities.

- This is a copyright symbol: → Use ©
- This is a heart symbol: → Use ♥

- This is a non-breaking space: → Use ` `; between two words
- This is a greater than sign: → Use `>`;
- This is a less than sign: → Use `<`;

Q-2.7: Create an HTML page that embeds a YouTube video using an `<iframe>` tag with the following requirements:

- Set `width="560"` and `height="315"`.
- Add the `allowfullscreen` attribute so the video can be viewed in full screen.
- Add a heading above the video using `<h2>` and a short description below using `<p>`.
- Embed at least 3 different YouTube videos on the same page.

Q-2.8: Create an HTML page demonstrating text formatting tags.

Write a short paragraph about your favourite hobby and apply:

- `<b>` – bold text for the hobby name
- `<i>` – italic text for a quote about the hobby
- `<u>` – underline text for an important point
- `<s>` – strikethrough for something you no longer do
- `<mark>` – highlight a key word
- `<sup>` and `<sub>` – write a chemical formula or math expression (e.g., H_2O or x^2)

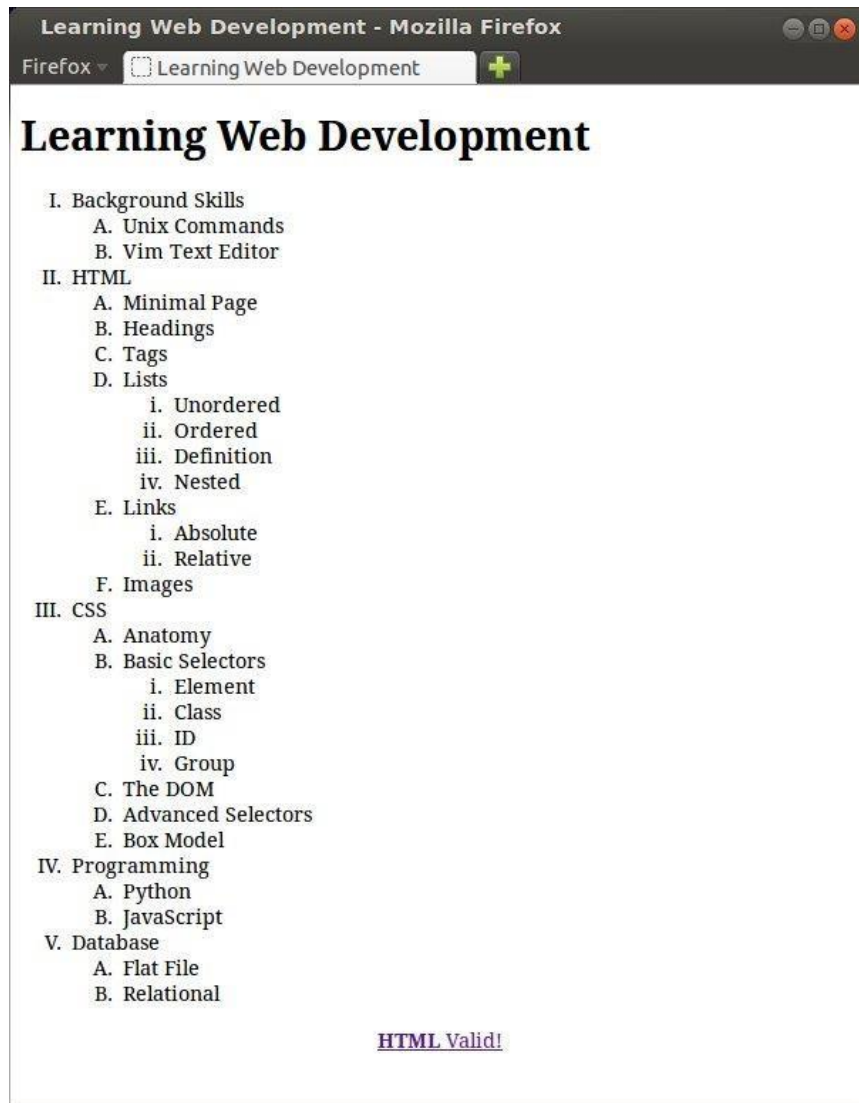

Q-2.9: Write an HTML page that uses HTML5 semantic tags to structure a simple news article page.

The page must contain:

- `<header>` – website name and navigation links (`<nav>`).
- `<main>` – main article content using `<article>` and `<section>`.
- `<aside>` – a sidebar with 3 related news headlines.
- `<footer>` – copyright notice using the `©` entity and contact email.
- At least one `<figure>` with `<figcaption>` inside the article.

Q-2.10: Create an HTML page that produces exactly the following output shown in the browser screenshot. Use nested `<ol>` lists with `type="I"`, `type="A"`, and `type="i"` to match the numbering style.

Expected Output:

Q-2.11: Create an HTML page titled "Fruits and Vegetables" that displays a 3-level nested unordered list using `<ul>` with `type="disc"`, `type="circle"`, and `type="square"` for each nesting level.

Expected Output:

Fruits and Vegetables

- Fruits
 - Citrus
 - Orange
 - Lemon
 - Lime
 - Tropical
 - Mango
 - Banana
 - Pineapple
 - Berries
 - Strawberry
 - Blueberry
 - Raspberry
- Vegetables
 - Leafy Greens
 - Spinach
 - Lettuce
 - Kale
 - Root Vegetables
 - Carrot
 - Potato
 - Radish

Q-2.12: Create an HTML page titled "My Daily Routine" that uses a 3-level nested ordered list. Use type="1" for the outer level (Morning/Afternoon/Evening/Night), type="a" for the second level, and type="i" for the third level.

Expected Output:

My Daily Routine

1. Morning
 - a. Wake up at 6:00 AM
 - b. Brush teeth and freshen up
 - c. Exercise
 - i. Warm up stretches
 - ii. Jogging for 20 minutes
 - iii. Cool down
 - d. Breakfast
2. Afternoon
 - a. School / College
 - i. Attend lectures
 - ii. Complete assignments
 - iii. Library study time
 - b. Lunch at 1:00 PM
 - c. Rest for 30 minutes
3. Evening
 - a. Outdoor games or hobby
 - b. Self study
 - i. Revise notes
 - ii. Practice problems
4. Night
 - a. Dinner at 8:00 PM
 - b. Read a book
 - c. Sleep by 10:30 PM

Q-2.13: Create an HTML page titled "Computer Science Syllabus" using a 3-level nested ordered list. Use type="I" (uppercase Roman) for the outer level, type="A" for the second level, and type="i" (lowercase Roman) for the third level.

Expected Output:

Computer Science Syllabus

- I. Fundamentals
 - A. Number Systems
 - i. Binary
 - ii. Octal
 - iii. Hexadecimal
 - B. Logic Gates
 - C. Boolean Algebra
- II. Programming
 - A. C Language
 - i. Variables and Data Types
 - ii. Control Structures
 - iii. Functions
 - iv. Pointers
 - B. Python
 - i. Syntax Basics
 - ii. Lists and Tuples
 - iii. File Handling
- III. Data Structures
 - A. Arrays
 - B. Linked List
 - C. Stack and Queue
 - D. Trees
 - i. Binary Tree
 - ii. BST
 - iii. AVL Tree
- IV. Networking
 - A. OSI Model
 - B. Protocols
 - i. TCP/IP
 - ii. HTTP / HTTPS
 - iii. FTP
 - C. IP Addressing

Q-2.14: Create an HTML page titled "Shopping List" combining nested lists for grocery items and a <dl> definition list to describe each item with <dt> and <dd> tags.

Expected Output:

Shopping List

Grocery Items

- Dairy Products
 - Milk â€" 2 litres
 - Butter â€" 200g
 - Cheese â€" 100g
- Grains
 - Rice â€" 5 kg
 - Wheat Flour â€" 2 kg
 - Oats â€" 500g
- Snacks
 - Biscuits
 - Chips
 - Dry Fruits

Item Descriptions

Milk

Full cream, pasteurised, packed in sealed pouch

Rice

Basmati variety, long grain, aged for 1 year

Oats

Rolled oats, quick cook, no added sugar

Butter

Salted, refrigerated, from local dairy

Q-2.15: Create an HTML page titled "World Geography" using mixed nested lists — `<ol type="1">` for continents, `<ul type="disc">` for the Countries section, `<ol type="a">` for country names, and `<ul type="circle">` for country details.

Expected Output:

World Geography

1. Asia

- Countries
 - a. India
 - Capital: New Delhi
 - Language: Hindi, English
 - Famous for: Taj Mahal, Yoga
 - b. China
 - Capital: Beijing
 - Language: Mandarin
 - Famous for: Great Wall, Pandas
 - c. Japan
 - Capital: Tokyo
 - Language: Japanese
 - Famous for: Mt. Fuji, Technology

2. Europe

- Countries
 - a. France
 - Capital: Paris
 - Language: French
 - Famous for: Eiffel Tower, Fashion
 - b. Germany
 - Capital: Berlin
 - Language: German
 - Famous for: Engineering, Oktoberfest

3. Americas

- Countries
 - a. USA
 - Capital: Washington D.C.
 - Language: English
 - Famous for: Hollywood, NASA
 - b. Brazil
 - Capital: Brasilia
 - Language: Portuguese
 - Famous for: Amazon, Football
